

RUGBY 2022

Where The Game Starts

ABOUT ELLGREN

Ellgren was established in Wigan, Lancashire in the early 1980's and became a major force within the sport of rugby throughout the 1980's & 1990's.

During this period Ellgren were regarded the premium brand in the sport, and were official kit suppliers to all the major clubs in that era, and had become renowned for the supply of the best quality products in the market, and with In-House manufacturing, Ellgren were able to offer a service to match.

For many years Ellgren have been creating a unique bespoke range of sports kit & apparel to the professional, amateur and grass roots markets.

During that era Ellgren were official suppliers to the likes of Wigan, Leeds, Warrington, Castleford and Bradford to name just a few.

At Ellgren we pride ourselves on supplying your team with the same high quality technical kit that we engineer for all of our professional teams. This means that when you order custom teamwear from us, you will be wearing the very same quality performance clothing that has made Ellgren one of the premium custom apparel suppliers in the UK.

Come and see our showrooms at our large new manufacturing and distribution facility on the outskirts of Leeds, close to the M1 and M62 motorways, where you can see our vast range of products and the comprehensive services we offer - all under the same roof.

Ellgren

THE NEW ERA

In 2020, Ellgren set up a brand new manufacturing facility in Leeds. With a totally new structure and a complete new team of experienced management and staff, all with a wealth of experience working with major brands within the UK Sportswear Industry. We also have our own in-house graphic design team on site.

We have an online kitbuilder where you can create and design your own on-field kit and leisurewear yourself, or alternatively you can come to our showrooms, see our products and sit down with our design team to create your own bespoke range from start to finish.

You can see the entire manufacturing process in our factory from start to finish, which enables us to have full control of our customers orders.

As well as the full sublimation manufacturing facility, we also have our own in-house embellishment departments, where we offer full printing facilities, screen printing and also in-house embroidery and digitising services.

Having full control over all of our production enables us to ensure that the service and delivery times we promise are achieved.

We strive to supply a high quality product at an affordable price, and a service to match - we will not compromise on these values.

Ellgren have more than 40 years experience of in-house manufacturing within the sportswear market, and from our Leeds based production facility, with all the latest modern technology, we continue to raise the standards and provide the best products on the market at affordable prices, alongside our unique and unrivalled service to our client base.

Right from the initial design process to printing, pressing, sewing, finishing, Ironing and packing, this all happens under our own roof with full control on sublimation products. In addition to this we also offer a variety of in-house embellishment services that includes print, screen print and Embroidery with extremely fast turnaround times.

Ellgren

**ELITE
JERSEYS**

BESPOKE ELITE JERSEYS

All Ellgren elite sublimated rugby jersey's are fully bespoke to your own personal specification, with unlimited design and colour options. The Ellgren elite jerseys are without question the most modern and technically advanced jerseys on the market in either code of Rugby.

Made from 100% soft feel polyester fabric containing elastine and liquid titanium, these jerseys are durable but comfortable and lightweight giving a great fit and feel, along with being quick drying and hardwearing. The performance collar is constructed to give strength but flexibility and comfort with a lycra front collar panel.

The elite fit is complemented with tight fitting sleeves that also are finished with lycra sleeve cuffs that both feel and look good. There are also lycra ventilation side panels that again allow comfort and additional movement and flexibility.

Our elite Jerseys also have the option of a fitted GPS pocket as we supply to the professional clubs, as well as the silicone chest grip to improve ball retention in wet conditions.

The inks used in the production of our jerseys are the best quality Italian inks that produce the most vibrant colours, that will not fade or colour run in the wash, and will stay looking as vibrant as the day you receive them, and for many years later.

We supply the same high specification jerseys to the grass roots and amateur sport, as we supply to the professional clubs within the sport.

Please see overleaf some design examples, although you can choose whatever designs you want with NO LIMITS !
